Logo and colours

Where possible, always use the blue logo with the dark grey line on a white background.

You can find all logos in this [folder](#).

OR apply the logos (blue or white) on an approved colour or background with overlay.

Logo guidance

Add suitable and even spacing around the logo.

Do not change the opacity, orientation or dimensions.

Avoid off-brand colours, using the logo directly on imagery or using colours/shades which result in the logo being hard to read.
